BOTTLE APPLICATOR

The most versatile and user-friendly tabletop bottle applicator the world has ever seen.

Additional fully adjustable right-side stopper for high and narrow products

Product sensor to apply secondary labels on products

Product guides for easy insertion and removal of difficult products

Retail

Manufacturing

The AG1000F is a high end but affordable semi-automatic applicator capable of applying labels onto a vast range of cylindrical products with diameters ranging from 20mm up to 120mm. Attached to a GoDEX printer of the ZX1000i series it forms a perfect print & apply solution for medium-sized breweries, wineries, butchers, manufacturers of cosmetics, contract packers and others who produce or distribute products in jars, cans, pots and bottles. Thanks to its innovative design the AG1000F is probably the most versatile of its kind, as well as extremely user-friendly. Adjusting it to a given product is a matter of minutes, if not seconds. Special optional stoppers and stopper bars enable fast and secure labelling of odd shaped products and with the optional sensor bottles can be labelled on two sides.

Specifications

Power	24V / 1,5A max, provided through printer GPIO interface
Min. product diameter	20mm
Max. product diameter	120mm
Operation speed	2ips / 4ips
Weight	8 kg
Dimensions - without printer	560mm x 350mm x 330mm
Dimensions - with printer	800 - 940mm x 350mm x 330mm
